

Garage Floor Tiles - Calculator

1. Measure the Length (**L**) and width (**W**) of the floor area you need to cover.
2. Use the chart below to calculate the number of tiles you require.
3. Divide your total number of tiles by 22 to determine how many boxes you will need.

For example: 5m x 3m = 161 tiles. Must round up to nearest number in lots of 22 = 176

$176 \div 22 = 8$ boxes.

Area		(L)								
		2m	3m	4m	5m	6m	7m	8m	9m	10m
(W)	2m	43	65	50	107	129	150	172	193	215
	3m	65	100	131	161	194	226	258	290	322
	4m	50	131	172	215	258	301	344	387	430
	5m	107	161	215	269	322	376	430	484	537
	6m	129	194	258	322	387	451	516	580	645
	7m	150	226	301	376	451	527	602	677	752
	8m	172	258	344	430	516	602	688	774	860
	9m	193	290	387	484	580	677	774	871	967
	10m	215	322	430	537	645	752	860	967	1075
		Number of Individual Tiles								

1 BOX = 22 Tiles

$$\begin{aligned}
 1.22\text{m} \times 1.525\text{m} &= 1.86\text{m}^2 \\
 0.305\text{m} \times 0.610\text{m} &= 0.18\text{m}^2
 \end{aligned}$$

Total Area = 2m² Approx
