

WHAT'S IN THE BOX

1 × 2.5mm Allen key

1 × PLUS Power PCB

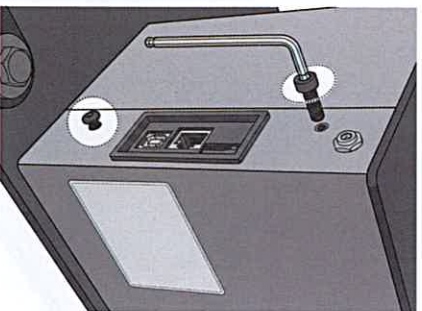

ABOUT THIS UPGRADE

Some ArcDroid units need a small amount of extra power to run the PLUS controller at full screen brightness. This quick upgrade adds a dedicated power board inside your ArcDroid to unlock maximum brightness.

INSTALLATION

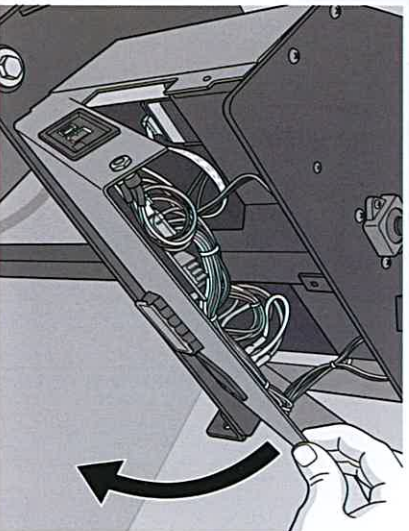

STEP 1 Disconnect power & open the back panel

Unplug the ArcDroid from all power sources.
Using the included 2.5mm Allen key, remove the four screws on the back panel.

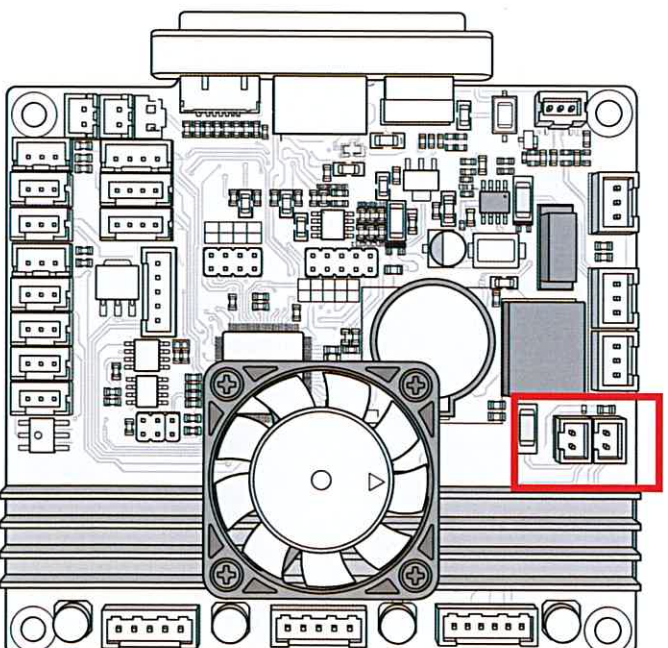

STEP 2 Locate Main Board

Carefully lay the back panel flat to expose the main board. Locate the Main board, on the left side of the back panel.

STEP 3 Install the PLUS Power PCB

Plug the PLUS Power PCB into the two open connectors. Press gently until it is fully seated and both connectors are engaged.

STEP 4 Close and secure the back panel

Carefully close the back panel and reinstall the four screws using the 2.5mm Allen key. Do not overtighten.

YOU'RE DONE

Maximum screen brightness is now enabled. Power on the ArcDroid and adjust brightness at any time from the Settings menu.
