

Powermax65/85/105 SYNC™

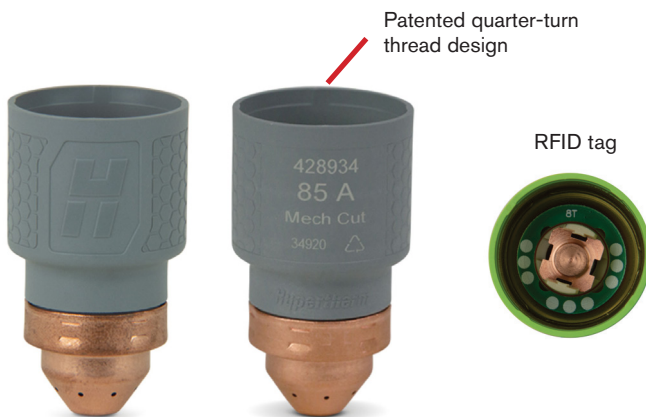

SmartSYNC™ 180° machine torch consumables

Hypertherm cartridge for Powermax® plasma systems

The simplicity of a single-piece consumable, optimized for maximum performance

The Hypertherm cartridge marks a revolutionary change to traditional plasma consumables. The cartridge is the product of several years of plasma engineering design expertise, combined with advanced manufacturing processes and materials. The result is a simplified consumable platform that is far from simple in performance.

- Cartridges have RFID tags that enable automated process set-up for Powermax SYNC™ systems using SmartSYNC™ torches. The tag also records valuable usage data for tracking consumable utilisation and performance.
- quarter-turn cartridges can be changed out in about 10 seconds!
- New SmartSYNC™ torches with the Hypertherm cartridge automatically set the correct amperage and operating mode, eliminating setup errors
- End of life detection lets the operator know when it's time to change the cartridge.

SmartSYNC™ cartridge RFID functions are designed for use with the Powermax65/85/105 SYNC™ systems

Order Number	Part Number	Description
P8231	428926	Finecut SmartSYNC™ CARTRIDGE
P8232	428925	45A SmartSYNC™ CARTRIDGE
P8233	428930	65A SmartSYNC™ CARTRIDGE
P8234	428934	85A SmartSYNC™ CARTRIDGE
P8235	428936	105A SmartSYNC™ CARTRIDGE
