Overview

The TECNA 7018 and 7900 hand held Spot Welders are light weight, reliable and simple to operate units for the smash repair and sheet metal fabrication industries. There are a variety of arms available for both units enabling a range of applications.

The 7900 has the added advantage of coming standard with a timer. A compensation circuit starts the timer only when there is a proper range of current which allows welding on oxidised sheets or materials with a painted surface. The 7913 is a 3 Phase, water cooled, hand held Spot Welder designed for heavy duty body repairs and light production work.
